Conditional statement:

3rd Q:

```java
package kumaranapplicaion;

import java.util.Scanner;

public class Exam {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.print("Enter Computer Science marks: ");
        int marks = sc.nextInt();

        if (marks >= 50) {
            System.out.println("Student has Passed");
        } else {
            System.out.println("Student has Failed");
        }

        sc.close();
    }
}
```

```
<terminated> Exam [Java Application] C:\Users\KUMARAN\.p2\pool\plugins\org.eclipse.j
Enter Computer Science marks: 70
Student has Passed
```

4th Q:

```java
package kumaranapplicaion;
import java.util.Scanner;

public class Divisibleby10 {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a number: ");
        int number = sc.nextInt();

        if (number % 10 == 0) {
            System.out.println("The number is divisible by 10");
        } else {
            System.out.println("The number is not divisible by 10");
        }

        sc.close();
    }
}
```

```
<terminated> Divisibleby10 [Java Application] C:\Users\KUMARAN\.p2\p
Enter a number: 77
The number is not divisible by 10
```

5th Q:

```java
package kumaranapplicaion;

import java.util.Scanner;

public class BiggestDigit {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a two-digit number: ");
        int number = sc.nextInt();
        number = Math.abs(number);
        int firstDigit = number / 10;
        int secondDigit = number % 10;
        if (firstDigit > secondDigit) {
            System.out.println("Biggest digit is: " + firstDigit);
        } else {
            System.out.println("Biggest digit is: " + secondDigit);
        }

    }
}
```

```
<terminated> BiggestDigit [Java Application] C:\Users\KUMARAN\.p2\pool\plugins\org.ecli
Enter a two-digit number: 79
Biggest digit is: 9
```

6th Q:

```java
package kumaranapplicaion;

import java.util.Scanner;

public class PlayPermission {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a value: ");
        int value = sc.nextInt();

        if (value == 1) {
            System.out.println("You can go out and play");
        } else {
            System.out.println("You cannot go out and play");
        }

        sc.close();
    }
}
```

```
<terminated> PlayPermission [Java Application] C:\Users\KUMARAN\.p2\pool\plugins\org.eclipse.justj.o
Enter a value: 1
You can go out and play
```

7th Q:

```java
package kumaranapplicaion;

import java.util.Scanner;

public class PlayPermission {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a value: ");
        int value = sc.nextInt();

        if (value == 1) {
            System.out.println("exam will easy");
        } else {
            System.out.println("exam will be difficult");
        }

        sc.close();
    }
}
```

```
<terminated> PlayPermission [Java Application] C:\Users\KUMAR
Enter a value: 8
exam will be difficult
```

8th Q:

```java
package kumaranapplicaion;

import java.util.Scanner;

public class Calculater {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter first number: ");
        int a = sc.nextInt();
        System.out.print("Enter second number: ");
        int b = sc.nextInt();
        System.out.print("Enter operator (+, -, *, /): ");
        char op = sc.next().charAt(0);
        if (op == '+') {
            System.out.println("Result: " + (a + b));
        }
        else if (op == '-') {
            System.out.println("Result: " + (a - b));
        }
        else if (op == '*') {
            System.out.println("Result: " + (a * b));
        }
        else if (op == '/') {
            System.out.println("Result: " + (a / b));
        }
        else {
            System.out.println("Invalid operator");
        }

        sc.close();
    }
}
```

```
<terminated> Calculater [Java Application] C:\Users\KUMA
Enter first number: 88
Enter second number: 66
Enter operator (+, -, *, /): *
Result: 5808
```
